MARINE ARCHITECTS & ENGINEERS
— CUSTOM BOAT BUILDERS —

Stephen T. Wessel • President

March 16, 2020

An open letter to our valued Customers, Vendors and Friends.

In light of the current crisis effecting our Nation with the Corona Virus spreading among our population, we would like to take a moment of your time to explain our position on the matter at Wesmac Custom Boats, Inc..

We value the safety and overall good health of our Crew above and beyond any standards implied or imposed by any governmental agency and will take all steps necessary, and within our power, to protect them from illness.

We constantly monitor our supply chains for availability of the products necessary to build our fine watercraft. Working within a global economy is always challenging to a business such as ours, times like this only make it more difficult. For the near-term, we have been able to source the products necessary, with only minor interruptions being experienced, thanks to our well established and high-quality Vendors. We are hopeful that our partner businesses, whom we source products from, are in a similar place as us and will continue to provide us with the parts required.

This is a very fluid time we live in. At the moment there are no plans to temporarily shut down our operations or send our crew home for quarantine. We like to think that it is "business as usual" in the broad sense and that we will strive to stay on task and maintain our schedules without any change in operations. Spring is a busy time of year for any marine-related operation, and any interruption to our plans will rapidly affect all aspects of our business.

This is the news for today, things could easily and quickly change.

Thank you all for being a part of our team. Working together in difficult times can only make us stronger.

Yours sincerely:

Bill Grindle

General Manager

Wesmac Custom Boats, Inc.
